

Manufacturer's name: Yantai Lisong Safety Technology Co., Ltd.

Address: Building 2, Huari Industrial Park, No. 16, Hongkong

Road, Yantai Economic and Technological Development

Zone, Yantai City, Shandong Province, China

Date: 28.03.2020

CCQS Project Reference: CE-PC-200308-022

Confirmation Letter

To whom it may concern:

This is to confirm that Yantai Lisong Safety Technology Co., Ltd., Address: Building 2, Huari Industrial Park, No. 16, Hongkong Road, Yantai Economic and Technological Development Zone, Yantai City, Shandong Province, China has entered into the service agreement CE-PC-200308-022 with CCQS Certification Services Limited, with regards to the application of Module B EU Type Examination Certification and Module D Production Monitoring for Particle filtering half mask, Model: 1206 within the scope of Personal Protective Equipment Regulation (EU) 2016/425 Category III.

If in any doubt about the integrity of this letter, please contact CCQS by email to verify.

Yours Faithfully.

Block1, Blanchardstown Corporate Park, Ballycoolin Rd., Blanchardstown, Dublin 15, D15 AKK1 Ireland Tel: +353 (0) 1 588 6920 Email info@ccqs.co.ie

Registered in Ireland as a Limited Company No.623897

Approved by Ireland Government as a Notified Body for CE Marking No.2834

National Quality Supervision and Testing Center for Personal Protective Equipment (Beijing)

No.55 Taoranting Street, Xicheng District, Beijing, China.

Fax: +86 10 63519250 +86 10 63520770

The Testing Center is accredited for compliance with ISO/IEC 17025.

The results of tests, calibrations and/or measurements included in this document are traceable to Chinese/national standards.

CNAS is a signatory to the ILAC mutual recognition arrangement for the mutual recognition of the equivalence of testing, calibration and inspection reports.

TEST REPORT

Particulate respirator-half facepiece

EN 149: 2001 +A1: 2009 Respiratory protective devices — Filtering half masks to protect against particles — Requirements, testing, marking

Product: Filtering half mask

Report No: 2020 (D) - 0009

Client: CCQS Certification Services Limited

Model (s): 1206

Date(s) of tests: 2020.03.18-2020.04.13

DESCRIPTION OF SAMPLES

General InformationClassification
FFP2 NR

Main Components
White folding mask

Manufacturer Yantai lisong safety technology Co., Ltd.

Manufacturer Address

Report No: 2020 (D) - 0009 Page 2 of 10

Conditions:

The test results presented in this report relate to the samples tested only.

This report may be reproduced and distributed to your clients, provided that it is reproduced and distributed in full.

The authenticity of this test report and its contents can be verified by contacting the laboratory.

Test Results

7.3 Visual inspection Not tested¹

The visual inspection shall include the marking and information supplied by the manufacturer.

Note1: As requested by the client, marking and information supplied by the manufacturer was not inspected.

7.4 Package Pass²

Particle filtering half masks shall be offered for sale packaged in such a way that they are protected against mechanical damage and contamination before use.

Note2: In accordance with the requirement.

7.5 Material Pass³

Materials used shall be suitable to withstand handling and wear over the period for which the particle filtering half mask is designed to be used.

Any material from the filter media released by the air flow through the filter shall not constitute a hazard or nuisance for the wearer.

After undergoing the conditioning described in 8.3.1 none of the particle filtering half masks shall have suffered mechanical failure of the facepiece or straps.

When conditioned in accordance with 8.3.1 and 8.3.2 the particle filtering half mask shall not collapse.

Note3: No mechanical failure after undergoing the conditioning described in 8.3.1. No collapse when conditioned in accordance with 8.3.1 and 8.3.2.

7.6 Cleaning and disinfecting

 N/A^4

If the particle filtering half mask is designed to be re-usable, the materials used shall withstand the cleaning and disinfecting agents and procedures to be specified by the manufacturer.

Note4: Single shift use only.

7.7 Practical performance

Pass⁵

The particle filtering half mask shall undergo practical performance tests under realistic conditions. **Note5: No imperfections.**

7.8 Finish of parts

Pass⁶

Parts of the device likely to come into contact with the wearer shall have no sharp edges or burrs. Note6: No sharp edges or burrs.

7.9.1 Total inward leakage

Pass⁷

For particle filtering half masks fitted in accordance with the manufacturer's information, at least 46 out of the 50 individual exercise results (i.e. 10 subjects x 5 exercises) for total inward leakage shall be not greater than: 25% for FFP1, 11% for FFP2, 5% for FFP3

and, in addition, at least 8 out of the 10 individual wearer arithmetic means for the total inward leakage shall be not greater than

22% for FFP1, 8% for FFP2, 2% for FFP3

Note7: FFP2 respirator. Test results are shown in Annex A Table 7.9.1-A&B.

7.9.2 Penetration of filter material

Pass8

The penetration of the filter of the particle filtering half mask shall meet the requirements of Table 1.

Sodium chloride test 95 l/min

Paraffin oil test 95 l/min

FFP1 ≤20%

≤20%

Report No: 2020 (D) - 0009

FFP2 $\leq 6\%$ $\leq 6\%$ FFP3 $\leq 1\%$ $\leq 1\%$

Note8: FFP2 respirator. Test results are shown in Annex A Table 7.9.2.

7.10 Compatibility with skin

Pass9

Materials that may come into contact with the wearer's skin shall not be known to be likely to cause irritation or any other adverse effect to health.

Note9: No irritation or any other adverse effect to health.

7.11 Flammability Pass¹⁰

When tested, the particle filtering half mask shall not burn or not to continue to burn for more than 5 s after removal from the flame.

Note10: Test results are shown in Annex A Table 7.11.

7.12 Carbon dioxide content of the inhalation air

Pass¹¹

The carbon dioxide content of the inhalation air (dead space) shall not exceed an average of 1,0 % (by volume) Note11: Test results are shown in Annex A Table 7.12.

7.13 Head harness Pass¹²

The head harness shall be designed so that the particle filtering half mask can be donned and removed easily. The head harness shall be adjustable or self-adjusting and shall be sufficiently robust to hold the particle filtering half mask firmly in position and be capable of maintaining total inward leakage requirements for the device.

Note12: Head harness can be donned and removed easily, adjustable or self-adjusting and have sufficiently robust to hold the particle filtering half mask firmly.

7.14 Field of vision Pass¹³

The field of vision is acceptable if determined so in practical performance tests.

Note13: Pass the practical performance tests.

7.15 Exhalation valve N/A¹⁴

A particle filtering half mask may have one or more exhalation valve(s), which shall function correctly in all orientations.

If an exhalation valve is provided it shall be protected against or be resistant to dirt and mechanical damage and may be shrouded or may include any other device that may be necessary for the particle filtering half mask to comply with 7.9.

Exhalation valve(s), if fitted, shall continue to operate correctly after a continuous exhalation flow of 300 l/min over a period of 30 s.

When the exhalation valve housing is attached to the faceblank, it shall withstand axially a tensile force of 10 N applied for 10 s.

Note14: No exhalation valve.

7.16 Breathing resistance

Pass¹⁵

Classification	Maximum permitted resistance (mbar)								
	Inhalation	Exhalation							
	30 l/min	160 l/min							
FFP1	0.6	2.1	3.0						
FFP2	0.7	2.4	3.0						
FFP3	1.0	3.0	3.0						

Note15: FFP2 respirator. Test results are shown in Annex A Table 7.16.

Report No: 2020 (D) - 0009 Page 5 of 10

7.17 Clogging N/A¹⁶

7.17.2 Breathing resistance

Valved particle filtering half masks:

After clogging the inhalation resistances shall not exceed:

FFP1: 4 mbar, FFP2: 5 mbar, FFP3: 7 mbar at 95L/min continuous flow

The exhalation resistance shall not exceed 3 mbar at 160 L/min continuous flow

Valveless particle filtering half masks

After clogging the inhalation and exhalation resistances shall not exceed:

FFP1: 3 mbar, FFP2: 4 mbar, FFP3: 5 mbar at 95L/min continuous flow

7.17.3 Penetration of filter material

Sodium chloride test 95 l/min		Paraffin oil test 95 l/min
FFP1	€20%	≤ 20%
FFP2	≪6%	€6%
FFP3	≤1%	≤1%
Note16: S	Single shift use only.	

7.18 Demountable parts N/A¹⁷

All demountable parts (if fitted) shall be readily connected and secured, where possible by hand **Note17: No demountable parts.**

9 Marking Not tested

9.1 Packaging

The following information shall be clearly and durably marked on the smallest commercially available packaging or legible through it if the packaging is transparent.

- 9.1.1 The name, trademark or other means of identification of the manufacturer or supplier.
- **9.1.2** Type-identifying marking.
- **9.1.3** Classification

The appropriate class (FFP1, FFP2 or FFP3) followed by a single space and then: "NR" if the particle filtering half mask is limited to single shift use only. Example: FFP3 NR, or "R" if the particle filtering half mask is re-usable. Example: FFP2 R D.

- **9.1.4** The number and year of publication of this European Standard.
- **9.1.5** At least the year of end of shelf life. The end of shelf life may be informed by a pictogram as shown in Figure 12a, where yyyy/mm indicates the year and month.
- **9.1.6** The sentence 'see information supplied by the manufacturer', at least in the official language(s) of the country of destination, or by using the pictogram as shown in Figure 12b.
- **9.1.7** The manufacturer's recommended conditions of storage (at least the temperature and humidity) or equivalent pictogram, as shown in Figures 12c and 12d.
- **9.1.8** The packaging of those particle filtering half masks passing the dolomite clogging test shall be additionally marked with the letter "D". This letter shall follow the classification marking preceded by a single space.

9.2 Particle filtering half mask

Particle filtering half masks complying with this European Standard shall be clearly and durably marked with the following:

9.2.1 The name, trademark or other means of identification of the manufacturer or supplier.

Report No: 2020 (D) - 0009

- 9.2.2 Type-identifying marking.
- **9.2.3** The number and year of publication of this European Standard.
- **9.2.4** Classification

The appropriate class (FFP1, FFP2 or FFP3) followed by a single space and then: "NR" if the particle filtering half mask is limited to single shift use only. Example: FFP3 NR, or "R" if the particle filtering half mask is re-usable. Example: FFP2 R D.

- **9.2.5** If appropriate the letter D (dolomite) in accordance with clogging performance. This letter shall follow the classification marking preceded by a single space
- **9.2.6** Sub-assemblies and components with considerable bearing on safety shall be marked so that they can be identified.
